DETAILED ACTION

CLAIMS

Summary

Claims 1 and 8 are the independent claims under consideration in this Office Action.

Claims 2-7 and 9-15 are the dependent claims under consideration in this Office Action.

Claim Rejections - 35 U.S.C. § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8,11 and 13 are rejected under 35 U.S.C. § 102(b) as being anticipated by Robinson et al. (5,326,150).

Robinson et al. teach a method for forming a knitted fabric material and sewing this so as to form an upholstery item. Robinson et al. teach the method as including the steps of providing a piece of fabric with a knitted pattern thereon and including an interior seat portion with a pair of outboard bolster pieces 6 and 7. Robinson et al. teach sewing (column 8, line 19) selected areas and forming defined portions for the seat and bolsters and back (column 1, line 17) and side portions. This forms a cover for covering a foam portion 4 (figure 1) and provides the finished seat cover.

ALLOWABLE SUBJECT MATTER

Claims 1-7 are allowable over the prior art of record.

Claims 9,10,12 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

PERTINENT CITATIONS

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Thornton et al. Illustrate garment pieces formed from a sheet of bulk material. Clay illustrates forming a product from fur and hide portions. Miller illustrates a garment interlining formed of a bulk fabric and provided with a pattern thereon. Kennedy et al. Illustrate forming upholstery using layers of bulk material. Gerber illustrates a sheet material with index cuts for delineating a pattern and thereafter cutting the pattern from the bulk panel.
